🔗 My_Portfolio

🧩 SKILLS

Languages TypeScript | Python | JavaScript | HTML/CSS

Developer Tools VS Code

Technologies/Frameworks Nextjs | Node.js | ExpressJS | Django | Bootstrap | WordPress

Cloud/Databases MongoDB

Version Control Git | github

Other Skills Data Structures & Algorithms | | Object Oriented Programming | Restful API

🎓 EDUCATION

Bachelor of Technology in Computer Science Engineering

Institute of Technology And Management

2021 – present | Aligarh, Uttar Pradesh

Board of High School and Intermediate Education

12th Hiralal barah saini inter college Aligarh

2017 | Aligarh, Uttar Pradesh

📁 INTERNSHIPS / TRAININGS

Career Ninja Bootcamp

Developer - Internship

Aug 2023 – Nov 2023

- Engaged in a comprehensive full-stack development program with a focus on MERN technologies. Developed and deployed multiple projects, refining skills in both frontend and backend development.

🧠 INTERESTS

Photography

I enjoy capturing moments with my DSLR camera and love turning them into art through postprocessing using tools like Adobe Photoshop.

📄 PROFILE

Aspiring full-stack developer specializing in the MERN stack, with a strong focus on Node.js and JavaScript. Proficient in React for frontend development, I balance backend expertise with full-stack capabilities. Committed to delivering high-quality code, I continuously enhance my skills in both backend and frontend development using JavaScript, Node.js, and React.

📁 PROJECTS

E-commerce-nestJS

- This is an e-commerce api application built with the NestJS framework
- uses Mongoose, indicating interaction with a MongoDB database
- This project uses Jest and Supertest for testing. It also uses ESLint and Prettier to keep the code clean and consistent

Tech Stack: NestJS, TypeScript, mongoose, RxJS

Wunderlust - Hotel Booking Web App | Live

- Wunderlust is a travel-oriented web application
- implementing **Node.js, Express.js, MongoDB, and Mongoose**.
- Integrated **user authentication to enhance security**, reducing vulnerabilities
- hotel **search functionalities** with location and preference filters using **EJS**.
- Created a responsive and modern user interface utilizing HTML, CSS, and JavaScript.

Webhook Project - Django Web App

- Developed webhook it is a callback function that allows communication between two application programming.
- Integrated Django to utilize MongoDB as the database backend for the application.
- Implemented CRUD operations and utilized Django REST Framework to create RESTful APIs.
- Tech stack:** Django, Django, MongoDB, Django REST Framework

Real-time chat application

Jan 2024 – Jan 2024

- I developed a real-time chat application utilizing Node.js, Express, and Socket.IO.
- deployed on the Render platform
- It includes user authentication using JWT
- message storage via MongoDB, and data security with bcrypt and Zod.

📄 CERTIFICATIONS & COURSES

Career Camp | Back End | Web Development

Established APIs, executed authentication, and established scalable back-end systems for web applications using Node.js, Express, and MongoDB.

Achieved proficiency in crafting and optimizing back-end solutions, contributing to enhanced web application functionality.

Career Camp | Front End | Web Development

- Fabricated and launched web applications with JavaScript, HTML, and CSS, showcasing practical skills gained during the immersive coding program.
- Demonstrated proficiency in web development, laying the foundation for innovative contributions in the field.
